

To whom it may concern: I feel it is ridiculous that XM satellite radio is being attacked for their great work as information providers regarding traffic and weather information. The lobbyist attacking have no right to influence satellite radio, as a paying customer it is my right to receive this personalized, regional information. I strongly encourage that you continue to allow XM radio to provide regional information. As AM evolved to FM, regional information has transferred as well, now, as FM evolves to XM the same should be true.
